

Dell recommends Windows® 7 Professional.

## Get networked.

## 8 reasons to upgrade to a Dell server.

Your business has grown, it's time to choose the next step and create a network. With a Dell PowerEdge™ server, you can do so much more for your business:

- 1. Protection** – Block unwanted content and IT threats
- 2. Privacy** – Control who has access to sensitive info with user names and passwords
- 3. Email** – Centralises your email system, provides collaboration features and eliminates risk of individual email setup collapsing
- 4. Backup** – Store and organise information and automatically back up documents
- 5. Services** – Easy installation by a Dell technician, and ProSupport for fast problem resolution
- 6. Printer** – Centralised, efficient control over your printer, scanner and other devices
- 7. Remote access** – Access documents and applications via the internet by installing a VPN
- 8. Share** – Share files, printers, contact lists and calendars with others
